

KRISHNA PRASAD SHAH

Data Analyst | Data Engineering | SQL | Python | Data Analytics

Vijayawada, India | [+91-9123120069](tel:+91-9123120069) | gautamshah826@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Computer Science undergraduate specializing in SQL, Python, and data analytics, with hands-on experience building ETL pipelines, optimizing queries, and delivering dashboards that support business decision-making. Skilled in exploratory analysis, data validation, anomaly detection, database design, and reporting automation. Familiar with Apache Spark, BigQuery, Snowflake, Databricks, and Generative AI tools. Focused on turning large, complex datasets into measurable business outcomes.

Education

SRM AP

2023 – 2027

B.Tech in Computer Science and Engineering

Andhra Pradesh, India

- **Core Courses:** DBMS, Data Structures & Algorithms, Machine Learning, Operating Systems, OOP, Probability & Statistics

Modern Indian School

2023

Higher Secondary Education - Science

Kathmandu, Nepal

Technical Skills

Languages: Python, SQL, C++

Databases: PostgreSQL, MySQL

Data Analysis: Pandas, NumPy, Data Cleaning, Data Validation, Exploratory Analysis, Statistical Analysis, Anomaly Detection

Visualization & Reporting: Power BI, Excel, Matplotlib, Dashboarding

Data Engineering: ETL Pipelines, Data Modeling, Database Design, Query Optimization, Indexing, Partitioning

Big Data & Cloud: Apache Spark, BigQuery, Snowflake, Databricks

Backend Development: FastAPI, SQLAlchemy, REST APIs

Machine Learning: Scikit-learn, XGBoost, Random Forest, Generative AI Tools

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

Experience

Software Development Intern

May 2024 – Jun 2024

Salesforce

Remote

- Created automation-driven solutions using Salesforce Flow and Apex triggers, cutting manual effort by **40%**.
- Partnered with business teams on structured data requirements to support reporting and process improvement.
- Translated business requirements into scalable technical solutions, backed by testing and documentation.

Projects

AI Job Portal Backend — FastAPI, PostgreSQL, SQL, SQLAlchemy, Python

- Designed ETL-ready relational schemas across **8+ entities** and optimized SQL queries using indexing and pagination, reducing query latency by **35%**.
- Performed data validation and integrity checks to eliminate duplicate and inconsistent records, improving overall data quality.
- Built analytical APIs supporting filtering, search, and reporting dashboards for job and recruitment analytics.
- Developed SQL-based reporting APIs enabling filtering, search, and analytics across job postings, applications, and recruiter activity.

Credit Card Fraud Detection — Python, Scikit-learn, XGBoost, Random Forest

- Developed an end-to-end fraud detection pipeline on 284,807 transactions (492 fraud cases) using Scikit-learn, XGBoost, and Random Forest.
- Ran exploratory analysis, preprocessing, and feature engineering, addressing severe class imbalance with SMOTE.
- Tuned pipelines via RandomizedSearchCV, reaching **0.98 ROC-AUC** with **85% recall** and **83% F1-score**.
- Added Isolation Forest-based anomaly features, lifting precision to **81%** while preserving recall.
- Benchmarked results with confusion matrices and standard classification metrics, then deployed the model via an interactive dashboard for real-time prediction.

Sales Data Analytics & Reporting Automation — Python, SQL, Pandas, Power BI, PostgreSQL

- Analyzed a sales dataset containing **12,000+ transactions** using SQL, Python, and Pandas to identify customer purchasing patterns, seasonal trends, and revenue insights.
- Performed data cleaning, validation, aggregation, and exploratory data analysis (EDA), improving data quality by handling missing values, duplicates, and inconsistent records.
- Designed interactive dashboards in Power BI and Excel tracking **10+ business KPIs**, enabling faster monitoring of sales performance across products and regions.
- Automated recurring reporting workflows using Python, reducing manual report generation time by approximately **40%**.

Achievements

- Solved **250+** coding problems across LeetCode and GeeksforGeeks.
- Shipped multiple data-driven and backend projects spanning Python, SQL, PostgreSQL, and FastAPI.
- Strong foundation in query optimization, DBMS, ETL concepts, and data analytics.

Certifications

- **ML Specialization:** Breast Cancer Prediction, K-Means Clustering, SVM, Logistic Regression, Naive Bayes, NLP Sentiment Analysis, Data Visualization, Linear Regression
